

VET Flexible Industry Pathway Student Expression of Interest Form

Flexible Industry Pathways (FIPs) are VET courses aligned to one of 26 industry areas, that can be studied during Year 11 or 12. FIPs are subsidised by the SA Government. FIPs courses may lead into a traineeship or apprenticeship or provide students with a VET qualification suitable for an entry level job upon graduation from school.

To access government subsidised FIPs courses, students are required to show VET Readiness Orientation (VETRO) by:

- providing evidence that they have completed some form of relevant preparation prior to applying to study the FIP VET course
- successfully undertake a literacy and numeracy assessment called an Upfront Assessment of Need (UAN).

Students interested in applying to study a Flexible Industry Pathway VET course should complete and submit this Expression of Interest Form to the VET Coordinator. Please note that the information below is required by the Department of Innovation and Skills to initiate the VETRO process to determine eligibility for subsidised VET courses for school students.

Student:

Class:

Students are required to demonstrate their eligibility for a subsidised Flexible Industry Pathway by providing evidence that they have completed some type of preparation related to the FIP they want to study. Evidence of preparation includes:

- work experience or work placement
- industry immersion
- short VET course/ micro credential
- relevant SACE Learning (e.g. Workplace Practices)

State the type of evidence of preparation that you have and will use to show your eligibility:
